

JCCME held “PWA-Ashghal Wastewater Seminar in Japan”

November 27, 2023

JCCME

JCCME hosted the "Wastewater Seminar for Qatar Public Works Authority (PWA-Ashghal)" in Tokyo on November 17, 2023, with the participation of 32 representatives from 16 Japanese companies. At the beginning of the seminar, Mr. MIYAKE Yasujiro, Director of the Middle East and Africa Division at the Ministry of Economy, Trade and Industry, kindly delivered a guest greeting. Following that, engineers from PWA-Ashghal gave presentations on the following three themes. Subsequently, a networking lunch was held for the Japanese participants and members of PWA-Ashghal.

- a) Current Status of Asset Management in the Qatar Sewage Sector
- b) Latest Developments and Challenges in Reclaimed Water Reuse in Qatar
- c) Latest Developments and Challenges in Sludge Treatment in Qatar

In addition, the PWA-Ashghal delegation made inspection tours to three Water Reclamation Centers in Tokyo (Ochiai, Shibaura and Morigasaki) and sewage-related facilities (Wadayayoi Sewer and Toubu Sludge Plant), and also visited to the Tokyo Metropolitan Sewerage Bureau's Sewage Technology Training Center, which PWA-Ashghal has shown a strong interest in the past.

Furthermore, they toured inspections of the factory of Onsite Wastewater Treatment System (Jyokaso), and were introduced as the advanced technology of Japanese companies supplying ceramic membranes and auto-strainers used in Water Reclamation Centers.

The seminar provided information to Japanese companies on business opportunities in Qatar's sewage sector and facilitated networking opportunities. Through this series of visits, there is potential for practical business connections for Japanese companies. JCCME will continue to further strengthen its relationship with PWA-Ashghal through follow-up and effective support for these developments.
