

"TOWARDS SUSTAINABLE AQUACULTURE"

Second Announcement

International Conference

Sustainable Aquaculture Development in the Sultanate of Oman

-Investment Opportunities-

10 - 11 December 2011

With an extensive tropical coastline and rich marine resources the Sultanate of Oman is embarking on an ambitious program of sustainable aquaculture development. The fundamentals are in place and your attendance at this conference will provide an early opportunity to identify investment opportunities for your organization. The conference will host regional and international speakers and will provide delegates with unique opportunities to meet government officials, advisors and representatives of funding and investment agencies. An important conference event will be an announcement by the government of multiple new sites for fish and shellfish farms (including eight, marine shrimp farm sites).

Conference themes:

- Oman's marine resources and biodiversity
- Global demand for seafood
- Regional status of aquaculture
- International case studies of aquaculture development
- Site availability, candidate species and farming systems.
- Application of Best Management Practices
- Training, research and support services
- The legal and regulatory framework
- Proposal submission and appraisal methods.
- Oman's investment climate, agencies and incentives

This conference, planned and hosted by the Ministry of Agriculture and Fisheries Wealth, will take place at the AL Bustan Palace Hotel, Muscat, Oman, 10 - 11 December 2011. For an invitation and further details please contact:-
